SUMMARY

Passionate and results-oriented **AI professional** with expertise in **Machine Learning** and **Data Science**, specializing in developing advanced **predictive** models and extracting actionable insights from complex **datasets**. Adept at leveraging **AI technologies** to drive innovation and solve **real-world challenges**. Dedicated to collaborating with **dynamic, cross-functional** teams to deliver data- driven solutions that propel meaningful advancements.

SKILLS

- Artificial Intelligence
- Machine Learning
- Data Science
- Deep Learning
- Web Development
- NLP
- Cloud Computing
- Data Structure
- Robotics
- Computer Vision
- Big Data Analytics
- Neural Networks
- **Programming Language:** Python, Java(Learning), SQL
- **Libraries & Tools:**
 - Numpy
 - Pandas
 - Scikit-learn
 - Matplotlib
 - PySpark
 - PowerBI
 - Django
 - ThingsBoard
 - Flask
 - React-JS

WORK EXPERIENCE

Websums Software Private Limited

January 1, 2025 - present

Python Developer

- Developed clean, modular, and reusable Python code for data processing pipelines, automation scripts, application logic, and RESTful APIs.
- Designed and implemented backend systems and automation tools using Python for efficient task execution and system integration.

Infotact Solution

April 25, 2025 - July 2025

Data Associate (L1) | Python Development

- Designed and implemented backend systems and automation tools using Python.
- Developed clean, modular, and reusable Python code for data processing, scripting, applications, and RESTful APIs.
- Integrated databases, web frameworks, and third-party services into existing systems to enhance functionality and scalability.

Exlearn Technologies

December 2023 - May 2024

Intern | Cloud Computing

- Successfully completed a structured Training and Internship Program focused on cloud computing.
- Gained practical experience with Amazon Web Services (AWS) and Microsoft Azure, including EC2, S3, Lambda, IAM, and Virtual Machines.
- Demonstrated proficiency in cloud infrastructure concepts and service models: SaaS, IaaS, and PaaS.

Project

Tomato Price Prediction | Python, Linear Regression, Machine Learning

May 28, 2014 – July 27, 2014

- Collected and analyzed historical pricing data to predict seasonal tomato prices.
- Employed Python libraries (Pandas, NumPy, Scikit-learn, Matplotlib) for data preprocessing, feature selection, model training, and visualization.
- Applied regression-based machine learning models to predict pricing trends with a focus on feature-predictor relationships.
- Enhanced model accuracy through hyperparameter tuning and cross-validation techniques.

EDUCATION

Certification | Microsoft Azur AI Fundamental (AI-900)

March 2025 – April 2025

- The Microsoft Azure AI Fundamentals (AI-900) certification provides foundational knowledge of artificial intelligence (AI) and machine learning (ML) concepts, with a focus on Microsoft Azure services.

Certification | Deep Learning (IITM)

January 2024 – April 2024

- Deep Learning offers effective solutions for such complex tasks, especially in Computer Vision.
- Learners gain the ability to apply deep learning to practical, real-world problems by the end of the course.

Graduation | Bachelor of Technology (B.Tech)

December 20, 2021 – Jun 2025

CSMSS Chh. Shahu College of Engineering, Chh.Sambhaji Nagar, Maharashtra

Artificial Intelligence and Data Science (AI&DS) | 8.21 CGPA
